CONTENTS AND SUBJECT INDEX

1. **OVERALL PROCESS SYSTEM DESIGN** 1
   - 1.1 **Introduction** 1
   - 1.2 **Planning Projects and Equipment Design** 2
   - 1.3 **Equipment and Instrumentation Codes** 6
   - 1.4 **Vessel Codes and Flange Ratings** 10
   - **References** 12

2. **DESIGN AND CORROSION** 13
   - 2.1 **Introduction** 13
   - 2.2 **Types of Corrosion** 13
   - 2.3 **Materials Evaluation and Selection** 18
   - 2.4 **Design Guidelines** 36
   - 2.5 **Glossary of Corrosion Terms** 46
   - **References** 50

3. **PROPERTIES AND SELECTION OF MATERIALS** 51
   - 3.1 **General Properties and Selection Criteria** 51
   - 3.2 **Properties of Cast Irons** 53
     - 3.2.1 Gray Cast Iron 55
     - 3.2.2 White Cast Iron 56
     - 3.2.3 Malleable Cast Irons 56
     - 3.2.4 Nodular Cast Iron 57
     - 3.2.5 Austenitic Cast Iron 57
   - 3.3 **Application Requirements of Cast Irons** 57
     - 3.3.1 Abrasion Resistance 57
     - 3.3.2 Corrosion Resistance 57
     - 3.3.3 Temperature Resistance 60

	3.3.4	Welding Cast Iron	60
3.4	**Properties of Steels**		61
	3.4.1	Low Carbon Steels (Mild Steel)	62
	3.4.2	Corrosion Resistance	63
	3.4.3	Heat Resistance	63
	3.4.4	Low Temperatures	63
	3.4.5	High-Carbon Steels	63
	3.4.6	Low-Carbon, Low-Alloy Steels	64
	3.4.7	Mechanical Properties	64
	3.4.8	Corrosion Resistance	64
	3.4.9	Oxidation Resistance and Creep Strength	65
	3.4.10	Low-Temperature Ductility	67
	3.4.11	High-Carbon, Low-Alloy Steels	67
3.5	**Properties of High-Alloy Steels**		67
	3.5.1	Chromium Steels (400 Series), Low-Carbon Ferritic (Type 405): 12–13% Chromium	68
	3.5.2	Medium Carbon Martensitic: 13–17% Chromium (Types 403, 410, 414, 416, 420, 431, 440)	68
	3.5.3	Medium Carbon Ferritic: 17–30% Chromium (Types 430 and 446)	68
	3.5.4	Chromium/Nickel Austenitic Steels (300 Series)	68
	3.5.5	Precipitation Hardening Stainless Steels	71
	3.5.6	Chromium/Nickel/Ferrite/Austenite Steels	72
	3.5.7	Maraging Steels	73
3.6	**Applications of High-Alloy Steels**		73
	3.6.1	Oxidation Resistance	74
	3.6.2	Mechanical Properties at Elevated Temperatures	74
	3.6.3	Mechanical Properties at Low Temperatures	74
3.7	**Corrosion-Resistant Nickel and Nickel Alloys**		74
	3.7.1	Nickel/Copper (Alloy 400)	75
	3.7.2	Nickel/Molybdenum	75
	3.7.3	Nickel/Molybdenum/Chromium	75
	3.7.4	Nickel/Chromium/Molybdenum/Iron	75
	3.7.5	Nickel/Chromium/Molybdenum/Copper	76
	3.7.6	Nickel/Silicon	76
3.8	**Heat-Resistant Nickel Alloys**		76
	3.8.1	Nickel/Chromium	76
	3.8.2	Nickel/Chromium/Iron	76
3.9	**Copper and Copper Alloys**		77
	3.9.1	Brasses	79
	3.9.2	Tin Bronzes	81
	3.9.3	Aluminum and Manganese Bronzes	81
	3.9.4	Silicon Bronzes	81
	3.9.5	Cupro-Nickels	83

3.9.6 Corrosion Resistance 83
3.10 Mechanical Properties of Lead and Lead Alloys 83
3.10.1 Corrosion Resistance 86
3.11 Aluminum and Aluminum Alloys 86
3.11.1 Aluminum Alloy Compositions 88
3.11.2 Aluminum of Commercial 99% Minimum Aluminum Purity 88
3.11.3 Nonheat-Treatable Magnesium and Manganese Alloys 88
3.11.4 Heat-Treatable Alloys 89
3.11.5 Casting Alloys 90
3.11.6 Temperature Effects 90
3.11.7 Corrosion Resistance 90
3.11.8 Organic Acids 91
3.12 Miscellaneous Precious Metals 93
3.12.1 Titanium 94
3.12.2 Tantalum 95
3.12.3 Zirconium 96
3.12.4 Precious Metals 97
3.12.5 Silver 97
3.12.6 Gold 98
3.12.7 Platinum 98
3.13 Metallic Coatings 98
3.13.1 Electrodeposition 98
3.13.2 Dip Coating 99
3.13.3 Sprayed Coatings 99
3.13.4 Diffusion Coatings 99
3.14 Carbon, Graphite and Glass 100
3.14.1 Carbon and Graphite 100
3.14.2 Glass 101
3.15 Cements, Bricks and Tiles 102
3.15.1 Cements 102
3.15.2 Bricks and Tiles 102
3.16 Plastic and Thermoplastic Materials 104
3.16.1 Polyolefins 104
3.16.2 Polyvinyl Chloride (PVC) 114
3.16.3 Rigid PVC (UPVC) 114
3.16.4 High-Impact PVC 114
3.16.5 Chlorinated PVC (CPVC) 114
3.16.6 Plastic PVC 115
3.16.7 Acrylonitrile-Butadiene-Styrene (ABS) 115
3.16.8 Fluorinated Plastics 115
3.16.9 Polyvinyl Fluoride (PVF) 115
3.16.10 Acrylics 116

3.16.11 Chlorinated Polyether 116
3.16.12 Nylon (Polyamide) 116
3.16.13 Miscellaneous Engineering Plastics 117
3.16.14 Acetal Resin 117
3.16.15 Polycarbonate 118
3.16.16 Polyphenylene Oxide 118
3.16.17 Polysulfone 118
3.17 Thermosetting Plastics 118
3.17.1 Phenolic Resins 119
3.17.2 Polyester Resins 119
3.17.3 Epoxy Resins 120
3.17.4 Furane Resins 120
3.17.5 Rubber Linings 121
3.18 Organic Coatings and Paints 123
3.19 Glossary of Fabrication and Plastics Terms 123
Nomenclature 141
References 141

APPENDIX A: GLOSSARY OF PLASTICS AND ENGINEERING TERMS 145

APPENDIX B: GENERAL PROPERTIES AND DATA ON ELASTOMERS AND PLASTICS 161
